

BASE 1

MOULDING # BA 1

CUSTOMER: _____

COMMENTS: _____

Well BA 1 is BA 1 for a reason. You have probably seen this design just about everywhere. It is also normal to always find a MDF version of this at Home Depots across the USA. Smooth contours make this profile a breeze to stain and paint.

We are your source Terminus, Tersa, and Centrolock inserts.
We have literally hundreds of different size, and we stock in long wear steel and carbide.
