

BASE BOARD 3

MOULDING # TS-BA 3

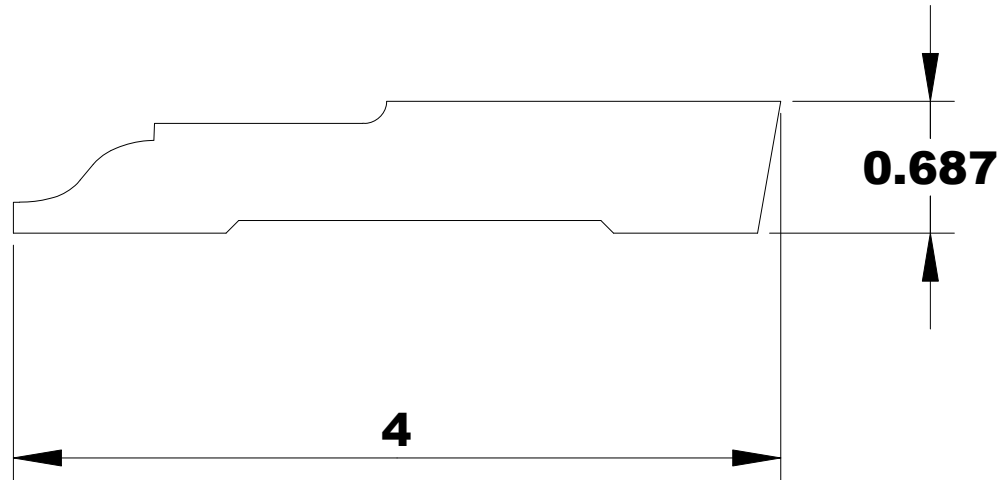

CUSTOMER: _____

COMMENTS: _____

BA 3 is a very popular base. It can be vary versatile in many environments. A .161 nose leads to a .732 wide ogee, before stepping up another .089. It then goes flat for 1.086 before entering the final .118 radius cove. Nice!

We have great planer knife sets in both high speed steel and carbide. They are competitively priced and stock deep for immediate shipment.
