

# PANEL MOULD 10

MOULDING # TS-PA 10

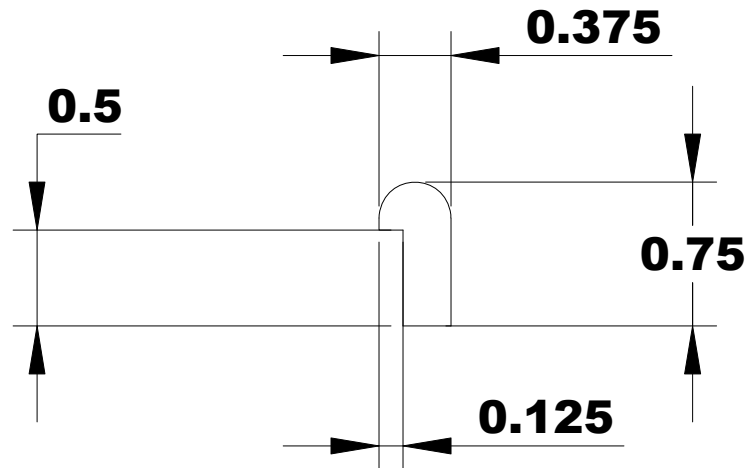

CUSTOMER: \_\_\_\_\_

COMMENTS: \_\_\_\_\_

The official name for this profile is PA 10, but it is also affectionately called J-Mould. It can be used to trim out just about anything. It is basically a bull-nosed piece of 3/8 x 3/4 s4s with a 3/8 radius bull-nose.

Have your knives ground by a professional grinder-man, with over 30 years of experience. Mouldingknives-quickly can shave some frustration out of your day!!
