PL 1 is a very common moulding profile used for a number of different applications. One most notable is for usage as an astragal mould between double doors. The elegant double cove and center bead can be used just about anywhere though. Very nice on wainscoting too!

Get longer lasting results for our William and Hussey customers, try our Black Nitride moulder steel. Black Nitride can last 50% longer than M2. It can also minimize knicks from hard maple and hickory.
